Testing

- Jest & Vitest
- Pytest & JUnit
- Playwright

DevOps & Tools

- Nginx & Ngrok
- CI/CD (GitHub Actions)
- Docker & Kind
- Canva & Figma

Development Experience

ASP Weather App

Full-stack responsive weather app with Remote Dictionary caching for performance and rate limiting.

GitHub Repository   Live on Fly.io

Built with: TypeScript, Angular (Zoneless v20+), NgRx, Vite, Java, Spring Boot, Redis.

ASP Job Application Tracker

Full-stack platform for organizing and tracking personal job applications, featuring secure authentication with 2FA (TOTP + backup recovery codes) and Dockerized client/server deployment. The application is fully tested with Playwright & Vitest on the client side and JUnit on the server side.

GitHub Repository   Live on Fly.io

Built with: TypeScript, Angular (Zoneless v20+), Vite, NgRx, Java, Spring Boot, PostgreSQL with Liquibase.

PERN Stack BookStores App

Full-stack platform for bookstore management and e-commerce.

GitHub Repository   Live on Fly.io

Built with: TypeScript, Vite, React, Redux, Express, PostgreSQL and Sequelize, Stripe.

Next QR Code Generator

Full-Stack platform for creating customizable QR codes generated server-side in Node.js.

GitHub Repository   Live on Fly.io

Built with: TypeScript, Next.js, Webpack, Redux, Node.js, Fastify.

Next Memory Game

Memory game with a customizable grid size and the option to play with icons or numbers as cards.

GitHub Repository   Live on Fly.io

Built with: TypeScript, Next.js, Webpack, Redux.
